

Care Instructions for Bromeliads

NEOREGELIA FIREBALL (Red)
NEOREGELIA PUNCTMISSIMA (Yellow with Stripes)
VR. CORCOVADENSIS (Purple)

These bromeliads require very little care.

Keep plants in a warm and sunny location. If the plant's color starts to fade, then the plant is not getting enough sunlight.

Water once a week by gently pouring water into the crown of the plant which should be sitting in a shallow dish.

Fertilize your bromeliad by using a weak liquid fertilizer about once every 2 months.
