

Care Instructions for Lithops

Lithops are succulents. They are easy to care for and don't require much maintenance.

- Media: Use a cactus mix or potting soil with sand
- Light: Bright light (as bright as possible), south facing window
- Water: **DO NOT OVER WATER!!!** At most, 2 tsp. once a month, and you can even stop watering in the dormant season of fall to spring. When in doubt, the motto is don't water.
- Flowering: To encourage flowering, add a diluted cactus fertilizer in spring when watering.
- Pests: They usually do not have many pest concerns. Watch for scales, gnats & fungus.
